

Perkins Coie's survey of 150 industry stakeholders involved in XR and next-gen technology, which encompasses technological advancements such as Web3 and the metaverse, shows that immersive technology has reached a critical point.

This year's survey [report findings](#) reveal that while stakeholders still expect the industry to grow, the pace of that growth will be slower than in recent years as companies seek to deliver on recent hype to an increasing number of XR consumers in the aftermath of sky-high growth and spending.
