

Perkins Coie Client Endiatx Demonstrates Revolutionary Pillbot at TED2024 Vancouver

PALO ALTO (April 30, 2024)—Perkins Coie client Endiatx, which has developed the world's first motorized pill camera for telemedicine, demonstrated its revolutionary Pillbot at the [TED2024](#) Vancouver conference that has the potential to eliminate invasive medical procedures.

Endiatx co-founder and chairman Alex Luebke ingested one of the company's wireless micro robotic pills on the TED stage that was then navigated around his stomach by Endiatx co-founder Vivek Kumbhari through the use of a game controller. Vivek is also a professor of medicine and chair of the Mayo Clinic's Division of Gastroenterology and Hepatology.

Perkins Coie has advised [Endiatx](#) since 2019 and guided the company as its outside corporate counsel through numerous funding rounds, including its latest Series Seed financing, and has also counseled the company on all its successful IP and patent work. The Perkins Coie advisory team includes partner [Jim Brenner](#) who has provided corporate counsel and patents and IP counselling respectively to Endiatx.

Endiatx is seeking Food and Drug Administration approval for its Pillbot that is designed to replace invasive upper endoscopies and enable broader medical and patient access to its lifesaving technology. Once ingested, the Pillbot can also be easily controlled by a tablet or smartphone.

Perkins Coie is a leading global law firm, dedicated to helping the world's most innovative companies solve the legal and business challenges of tomorrow. Learn about our work and values [here](#).
