

Marc Martin Quoted in Law360—The Top Telecom Developments to Watch in 2022

Partner Marc Martin was quoted in "[The Top Telecom Developments to Watch in 2022](#)," an article in *Law360*,* regarding the National Telecommunications and Information Administration's (NTIA) new leader, Alan Davidson.

"I think there was something special to the way the Trump administration allowed disagreements to flourish. It seemed to be a feature, not a bug," said Marc Martin, chair of Perkins Coie LLP's communications industry group. "I don't think that's the case with the Biden administration thus far. You would think that once the team is fully in place, that kind of thing won't happen."
