## Cos. Should Assess Risks of COVID-19 Biometric Tech

Thermometers and heat sensors and face scanners, oh my! Companies are increasingly developing biometric-enabled solutions, such as contactless entry and automated temperature and mask detection, to help employers safely return personnel to the office amid the COVID-19 pandemic.

But does implementing biometric technologies that promote health and safety also increase the risk of a lawsuit? Here are the basics of what you need to know about U.S. biometrics law if your company is considering adopting—or is developing—a biometric-enabled solution to the workplace during the pandemic.
