

In this episode, Michael Glenn and Colin Fowler meet with Barmak Heshmat and Christopher Barsi of Brelyon to discuss their immersive Ultra Reality displays. Their topics include the technical aspects behind the perspective and optics required to achieve a 10' virtual display from a significantly smaller physical screen.

"The advice that I would give the students is don't believe everything your teacher says. You know, sometimes they don't know the answer, which is fine. Pursuing those sorts of questions—those questions that really push them forward—is very, very valuable." - Christopher Barsi, Ph.D., Senior Scientist, Brelyon, Inc.
