

In this episode, Michael Glenn and Colin Fowler talk with Chris Needham and Frank Oudheusden, engineering consultants in the solar field, about issues faced in designing solar arrays and how radical changes in the market and technology lead to radical adaptations of the associated engineering.

*"My advice is to find a growth industry where you're not staring at a whole mass of experts that got in before you so that you're allowed to try the new things and to make the mistakes." - Chris Needham, Manager, Azimuth Advisory Services, LLC*
