

In this episode, Michael Glenn and Colin Fowler speak with Maxime Lamothe-Brassard of LimaCharlie about cybersecurity as a buildable cloud service.

Maxime discusses a thoughtful approach to product development that puts cloud service structure into context in terms of both market forces and the historical development of cybersecurity products.

“But the fundamental truth behind it is, all of this is just stuff made up by humans to make a system work. And if you read about it and you go and you try to understand it, you can step through it and you can do it.” - Maxime Lamothe-Brassard, Founder & CEO of LimaCharlie
